

JONATHAN MORALES

Charlotte, North Carolina, 28278

Cel: (347) 530-0016 jmoral1943@gmail.com

Determined Software Engineer seeking a Full-stack Software Engineer position. Where I can apply my talents in Software Development alongside with my years of experience developing web applications with cutting edge frameworks including robust programming languages to find creative, and innovative solutions.

Knowledge & Skills

React	Next.js
Node.js/Express.js	Webpack, Babel, NPM, Yarn
Redux	Enzyme
JQuery	REST API
JavaScript (ES6)	Debugging Tactics
Jest Testing	MongoDB

Projects

Expensify app

Front-End: React, Redux, SCSS

Back-end: Node.js / Express.js

Link: <https://morales-expensify.herokuapp.com/>

Key Features: Created a personal expense tracker with Firebase authentication and used React as a front end with Redux to manage the applications state. In the production version of my application as well as development I used webpack, with babel to compile JSX, javascript es6 syntax and SCSS to css. Deployed the a production application to Heroku using the production version of webpack to minify the file sizes. Used 67 Jest/Enzyme test Cases.

Chat App

Back-end: Node.js/Express.js/Socket.io

Key Features: Being able to create a real-time chat-app that is able to create users and chat rooms with live feedback with Socket.io real-time engine

Task-Manager App

Back-end: Node.js/ Express.js

Database: MongoDB (Mongoose)

Key Features: Use a local mongoDB to create a database that manage all the users that wanted to add, edit, and remove tasks to help them stay organized. Used Jest to test my application.

Weather app

Back-end: Node.js/Express.js REST API

Key Features: Ability to fetch a person's location from a third-party API and return there weather from JSON

WORK EXPERIENCE

SSI-SCHAEFER, CHARLOTTE, NORTH CAROLINA

Jr. Software Apprentice, Aug 2018 – Present

- Dealt with many high profile clients(Billionaire Companies) and testing there software for Quality Assurance.
- Ran/ Executed / Created multiple test cases on JIRA
- Manipulated and altered information on production databases
- Experience with JVM
- Mediated between our Clients and Developers

EDUCATION

MATH, ENGINEERING, TECHNOLOGY & SCIENCE AT OLYMPIC HIGH SCHOOL, CHARLOTTE, NORTH CAROLINA

- Graduated, June 2018 (Weighted GPA: 4.7 Rank: 17 out of 137)
- Engineering Diploma

CENTRAL PIEDMONT COMMUNITY COLLEGE, CHARLOTTE, NORTH CAROLINA

- GPA: 3.8
- IT associates with a concentration in Software Development
- TestOut Pc Pro Certification
- TestOut Network Pro Certification
